OSLC at Work: IBM Product Collaboration Portal
Collaborative feature management (PLM) and agile software development (ALM)

- Showcasing the mashup of product and process information across the enterprise linking Rational Team Concert, PDM, Focal Point, SAP and Sales catalog

- OSLC CM 1.0 supporting a query of Feature availability from development aligned with Feature value and release plans

- Collaborative Feature readiness assessment and agreement to promote Early Availability to meet market demand – driving responsiveness and competitive advantage

- A proof of concept to help drive to the vision for enterprise PLM based upon SOA

- Product Development Integration Framework in action
