The Steering Committee

1.

The OSLC Steering Committee

Rainer Ersch
Senior Research Scientist
Siemens

David Ingram
Managing Director
Accenture

Andreas Keis
Manager, Software Engineering
EADS Innovation Works UK

Mik Kersten
CEO
Tasktop

Bola Rotibi
Research Director
Creative Intellect

John Wiegand
Distinguished Engineer and Chief Architect
IBM Rational
(Steering Committee Chair)

Another Person
To be elected by the end of July
OSLC Member Section Supporting Entity

**OSLC StC
Staff Members:**

Sean Kennedy
OSLC StC
Operations Coordinator

Steve Speicher
OSLC StC
Technical Coordinator

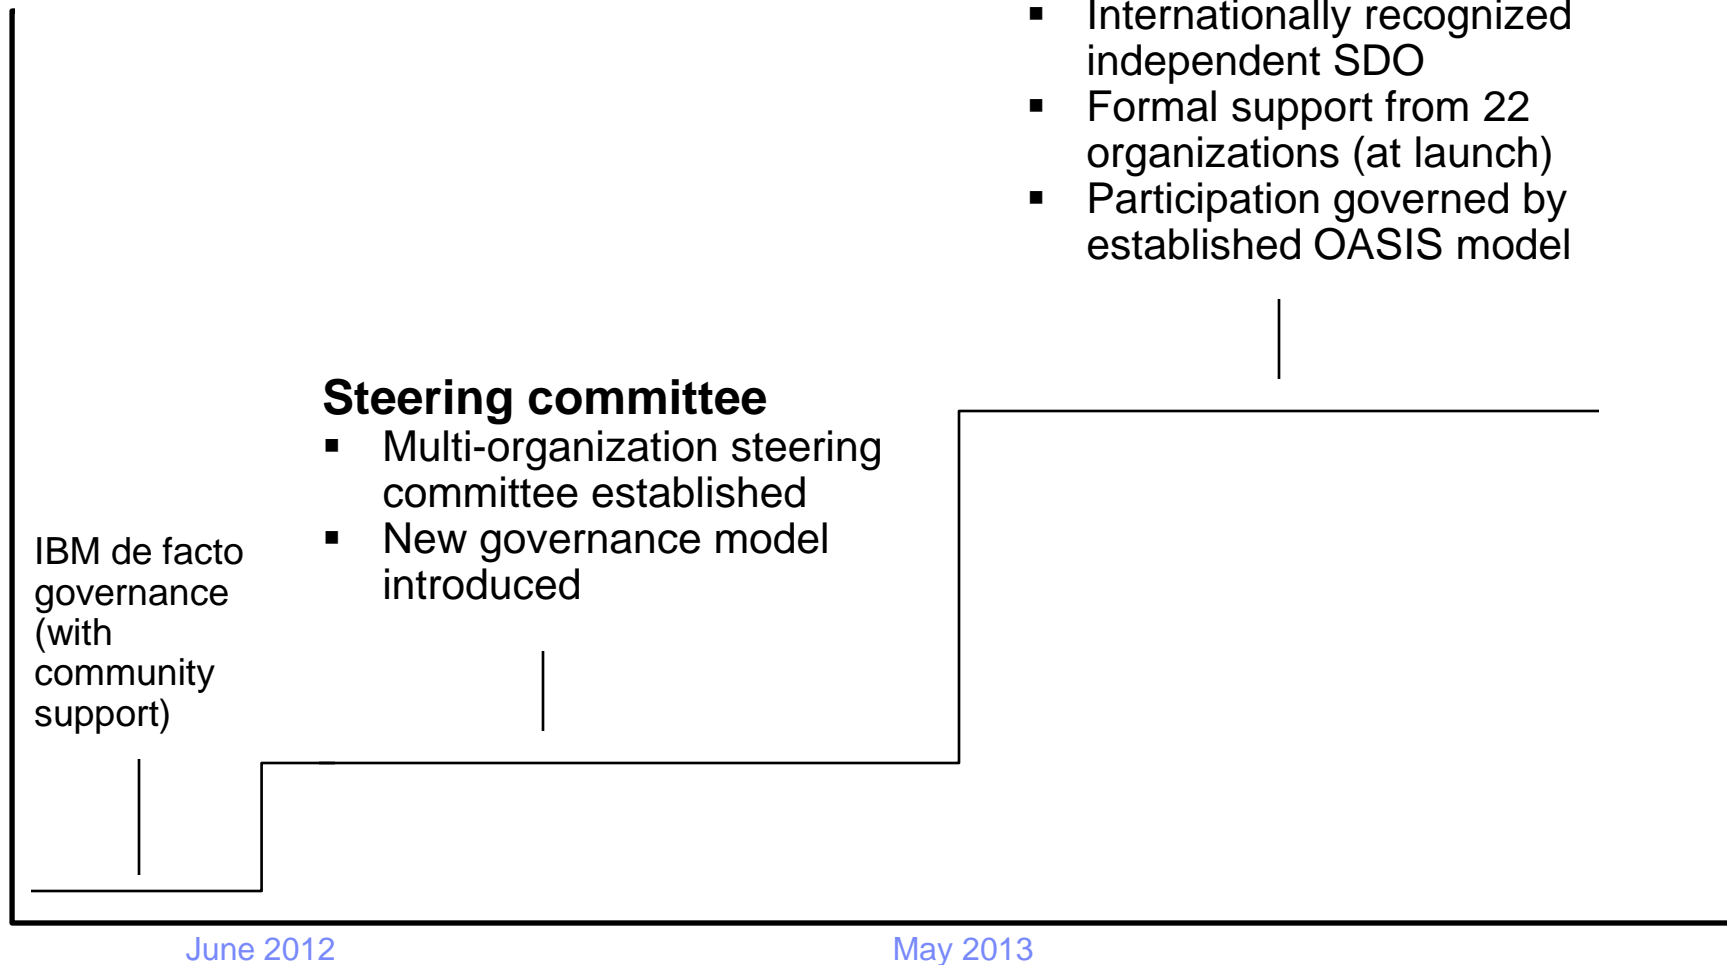

- Any person from a Member Section Supporting Entity may run in the election
- Each Supporting Entity, through it's Qualified Elector, may cast one vote
- Nomination period to be opened by OASIS staff no later than Thursday, July 4
- Election period will run from Thursday, July 18 – Wednesday, July 31
- The elected candidate will hold the seat for one year
 - (In 2014, the seats of the winner, Dave Ingram, and Bola Rotibi, will be up for election again, but this time for a two year term.)
 - (In 2015, the other four seats will be up for election, also a two year term.)
 - (In this way, “half” the Steering Committee seats will be up for election every year.)

The Vision for OSLC

2.

Community governance of OSLC

Software runs the world

But it is heterogeneous and disjoint

And it needs to be integrated

Traditional approaches to software integration require custom software

Custom software is expensive to maintain and a limit on future choice

Custom integrations drive software TCO higher and limit choice

Open standards are key enablers for broad and large-scale integration

OSLC standards simplify lifecycle integration leading to cost savings and increased flexibility

OSLC is helping the world run more efficiently

Standardizing OSLC at OASIS will increase adoption and acceptance of OSLC

The world will benefit from standardized integration through OSLC

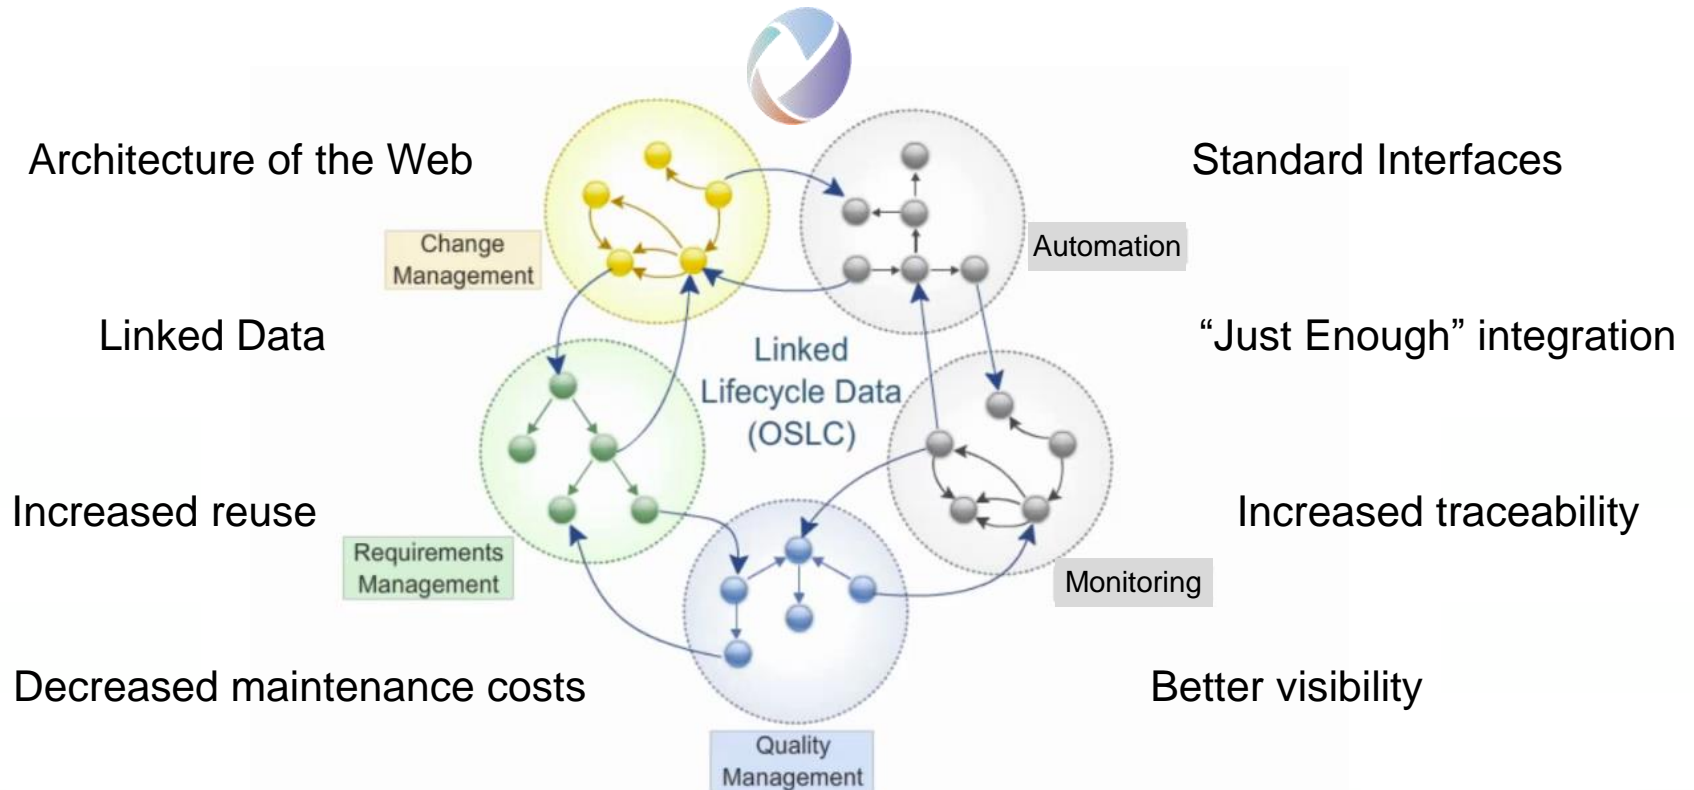

Foundational technology for all integration

The household name for integrations

Natural choice for standardizing loosely-coupled integrations in new domains

Users can work seamlessly across their tools

(complex and fragile synchronization schemes not required)

OSLC is an open and scalable approach to lifecycle integration. It simplifies key integration scenarios across heterogeneous tools

Technical Committee Creation Plan

3.

Open Services for Lifecycle Collaboration
Lifecycle integration inspired by the web

December 2012

- OSLC Steering Committee approves plan to standardize OSLC domain specs at OASIS

May 2013

- OASIS Board **unanimously** approves creation of the OSLC Member Section **co-founded by 22 organizations**

June 2013

- First OSLC Member Section Steering Committee meeting
- OSLC Member Section Kickoff meeting

3Q 2013

- Election of the 7th Steering Committee member
- OSLC Core 3 to be contributed to OASIS to launch the OSLC Core TC

4Q 2013 – 2014

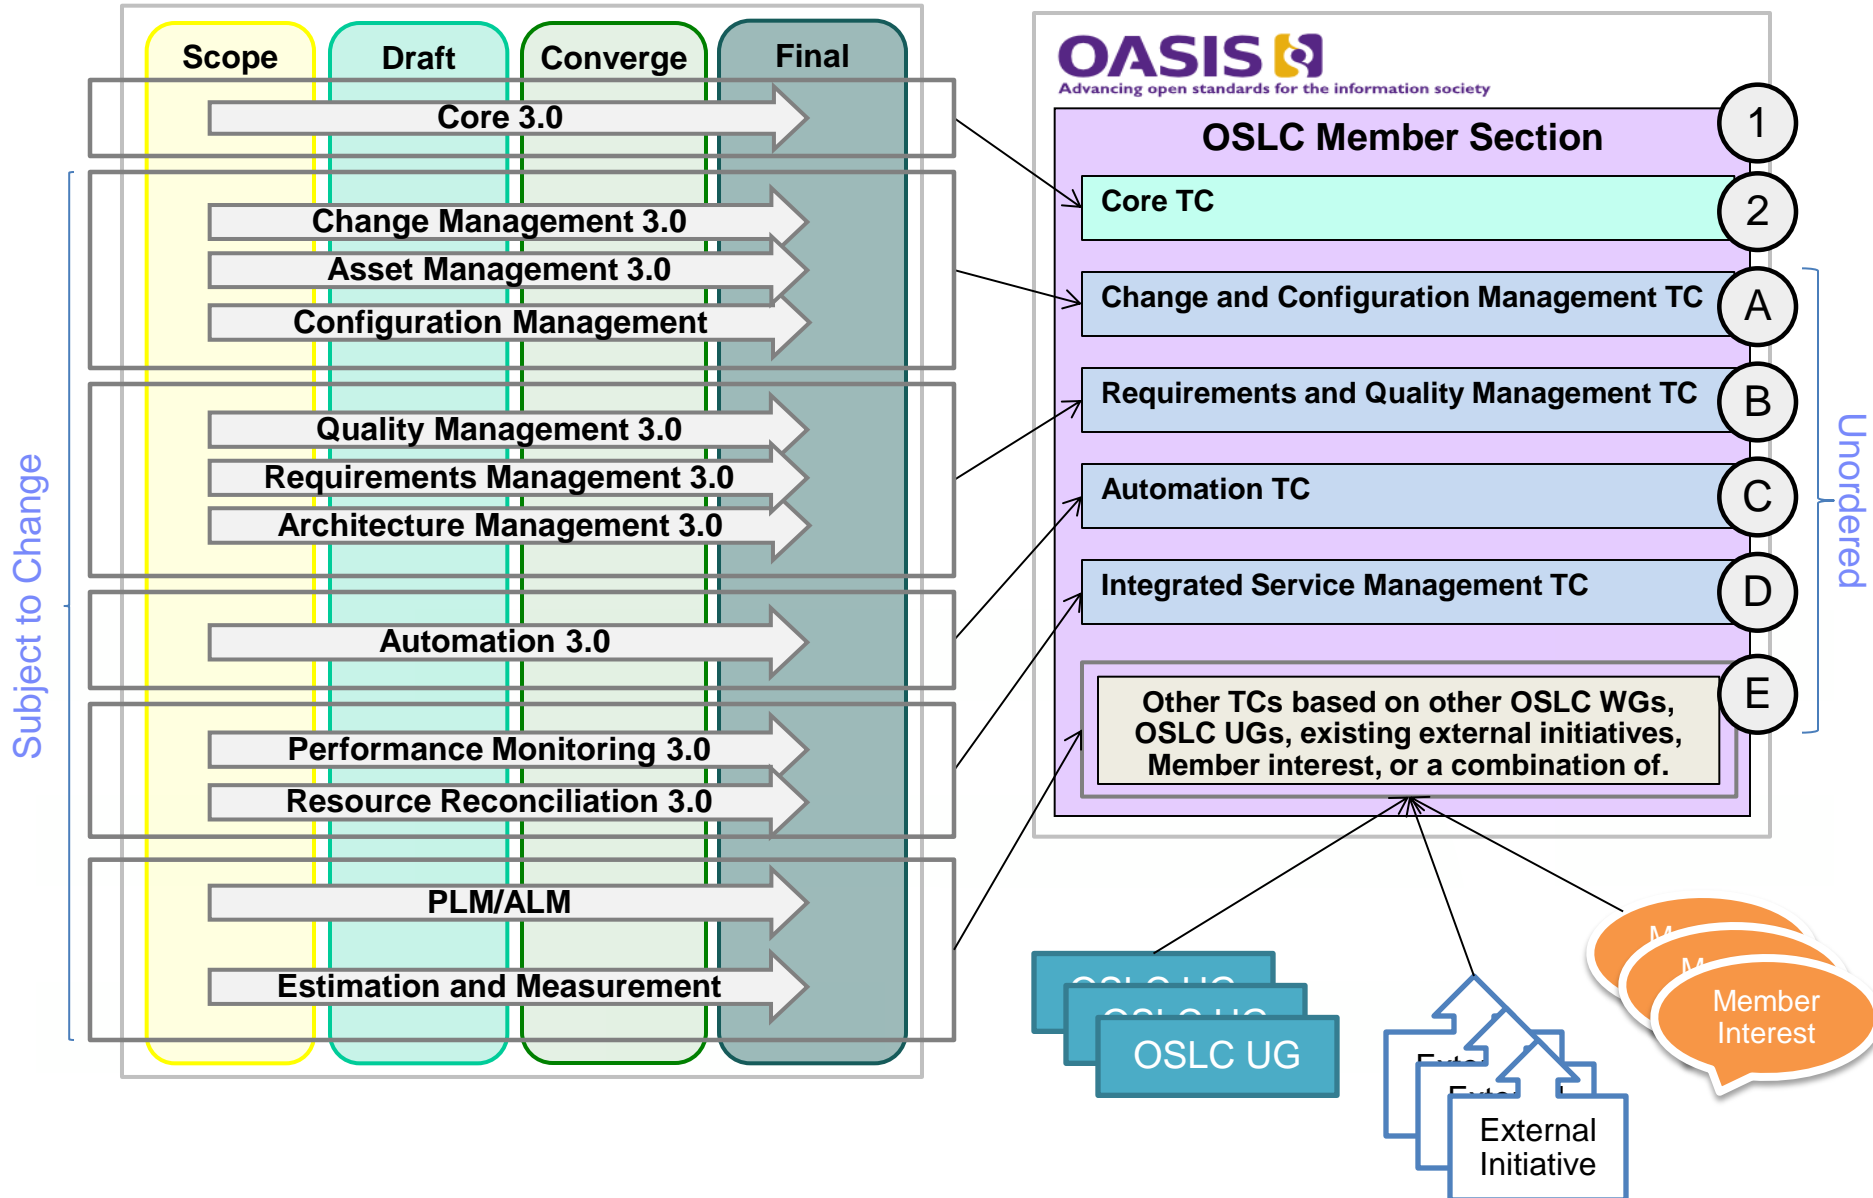

- Existing OSLC domain specs are contributed to create affiliated TCs
- New domain work to start as affiliated TCs

To be refined with input from the OSLC Member Section participants.

OASIS 

OSLC Member Section

Activity	Target End Date	Comments
Submit Core TC Charter to OASIS	2 August 2013	Proposed charter submitted to OASIS TC administrator.
Officially Launch Technical Committee	15 October 2013	Minimum 5 eligible people from at least 2 OASIS organizational members. Core 3 Spec to be initial TC Working Draft.
Phase 1: Producing first Committee Specification Draft	31 March 2014	
1st round Committee Spec Public Review Ends	30 April 2014	Collect comments from Member Section.
Phase 2: Addressing Public Review feedback	31 July 2014	Update Committee Spec, take to 2nd round review.
2nd round Committee Spec Public Review Ends	31 August 2014	Address review's comments. (Assume no further review required.)
Finalize Committee Specification	30 September 2014	No implementation or test case requirements.
Phase 3: OASIS Standard Review period & voting Ends	30 November 2014	60 review period, 14 day vote period. Requires 3 statements of use.
OASIS Standard	15 December 2014	

How To Participate Today

4.

- ✔ Join the OSLC Member Section at OASIS (if you're eavesdropping on us today)
- ✔ Get involved in the Steering Committee election
 - ✔ Stand for election
 - ✔ Make sure your organization votes
- ✔ Be a co-founder of the Core TC
- ✔ Get active at open-services.net
 - ✔ Complete a [Members Agreement](#) and get listed on the [Organizations page](#)
 - ✔ Join a [User Group](#) to help define scenarios
 - ✔ Join a [Work Group](#) to help define the version 3 specifications
- ✔ Start discussing your ideas and voicing your opinions
 - ✔ On the [OSLC Member Section mailing list](#)
 - ✔ On the [OSLC Forums](#)

Questions and Discussion

5.

BACKUP

Mission

- To standardize OSLC

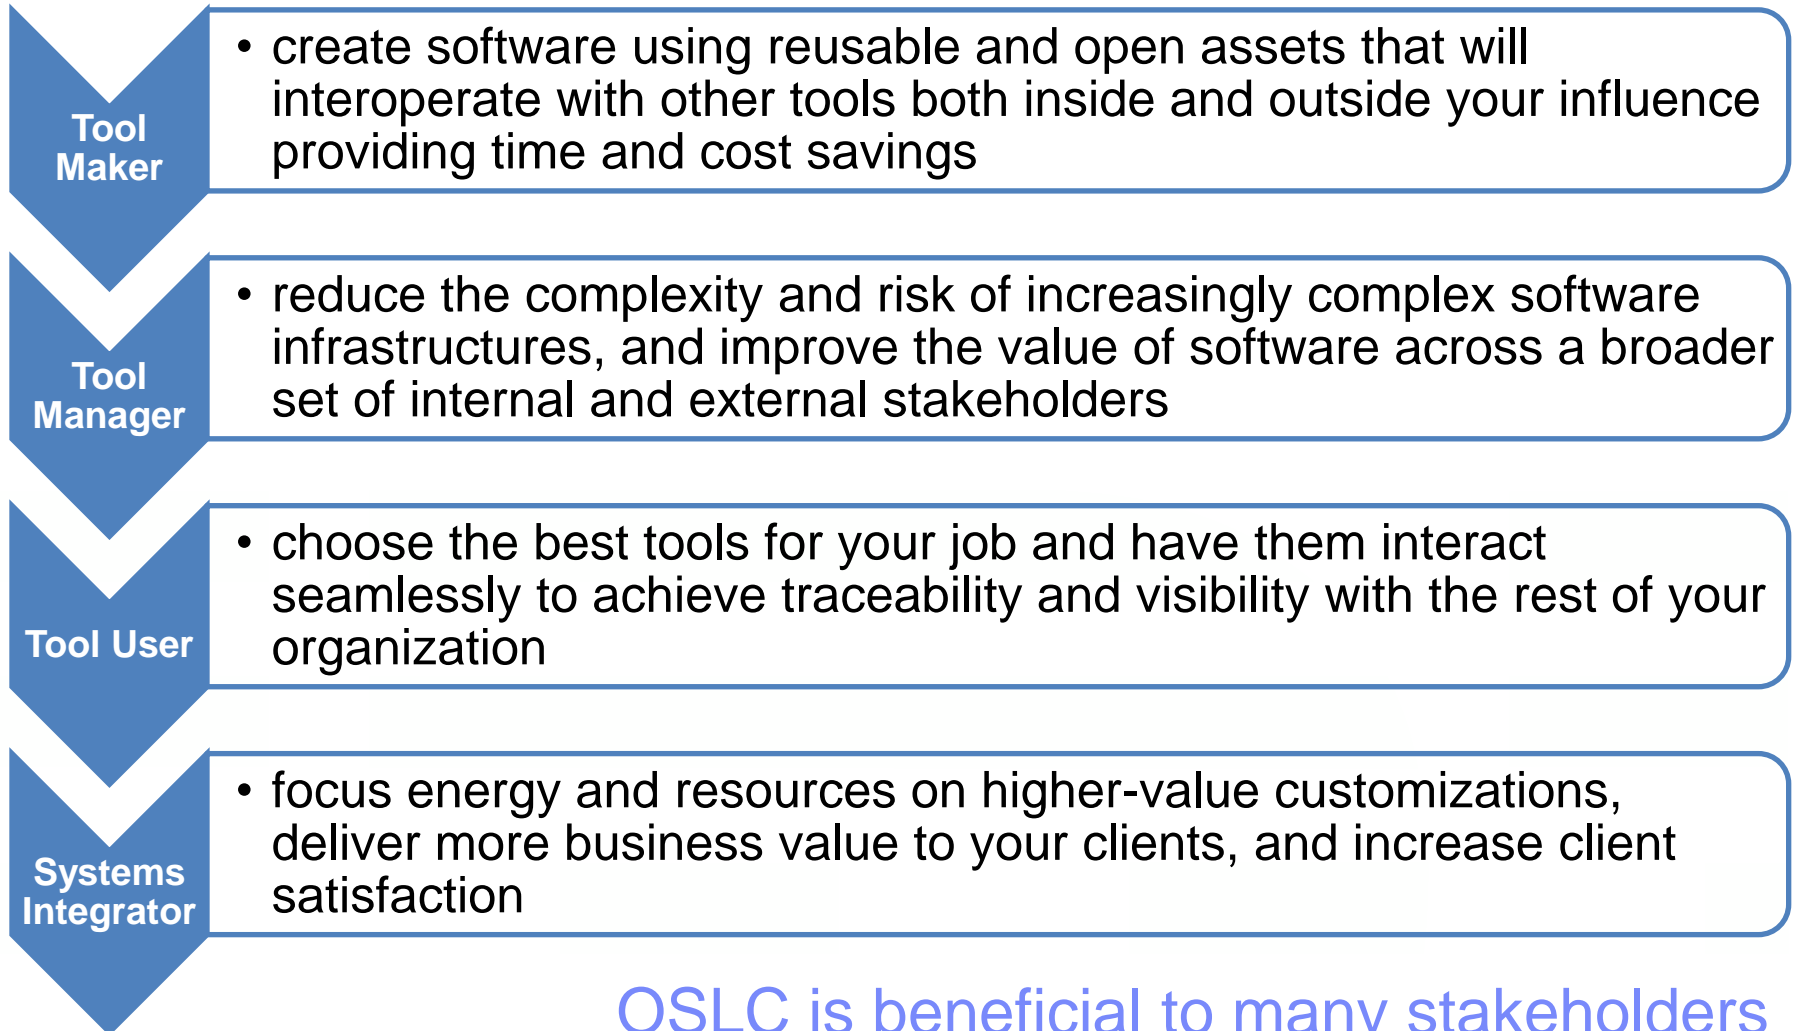

Support

- Co-founded by 22 organizations

Blessing

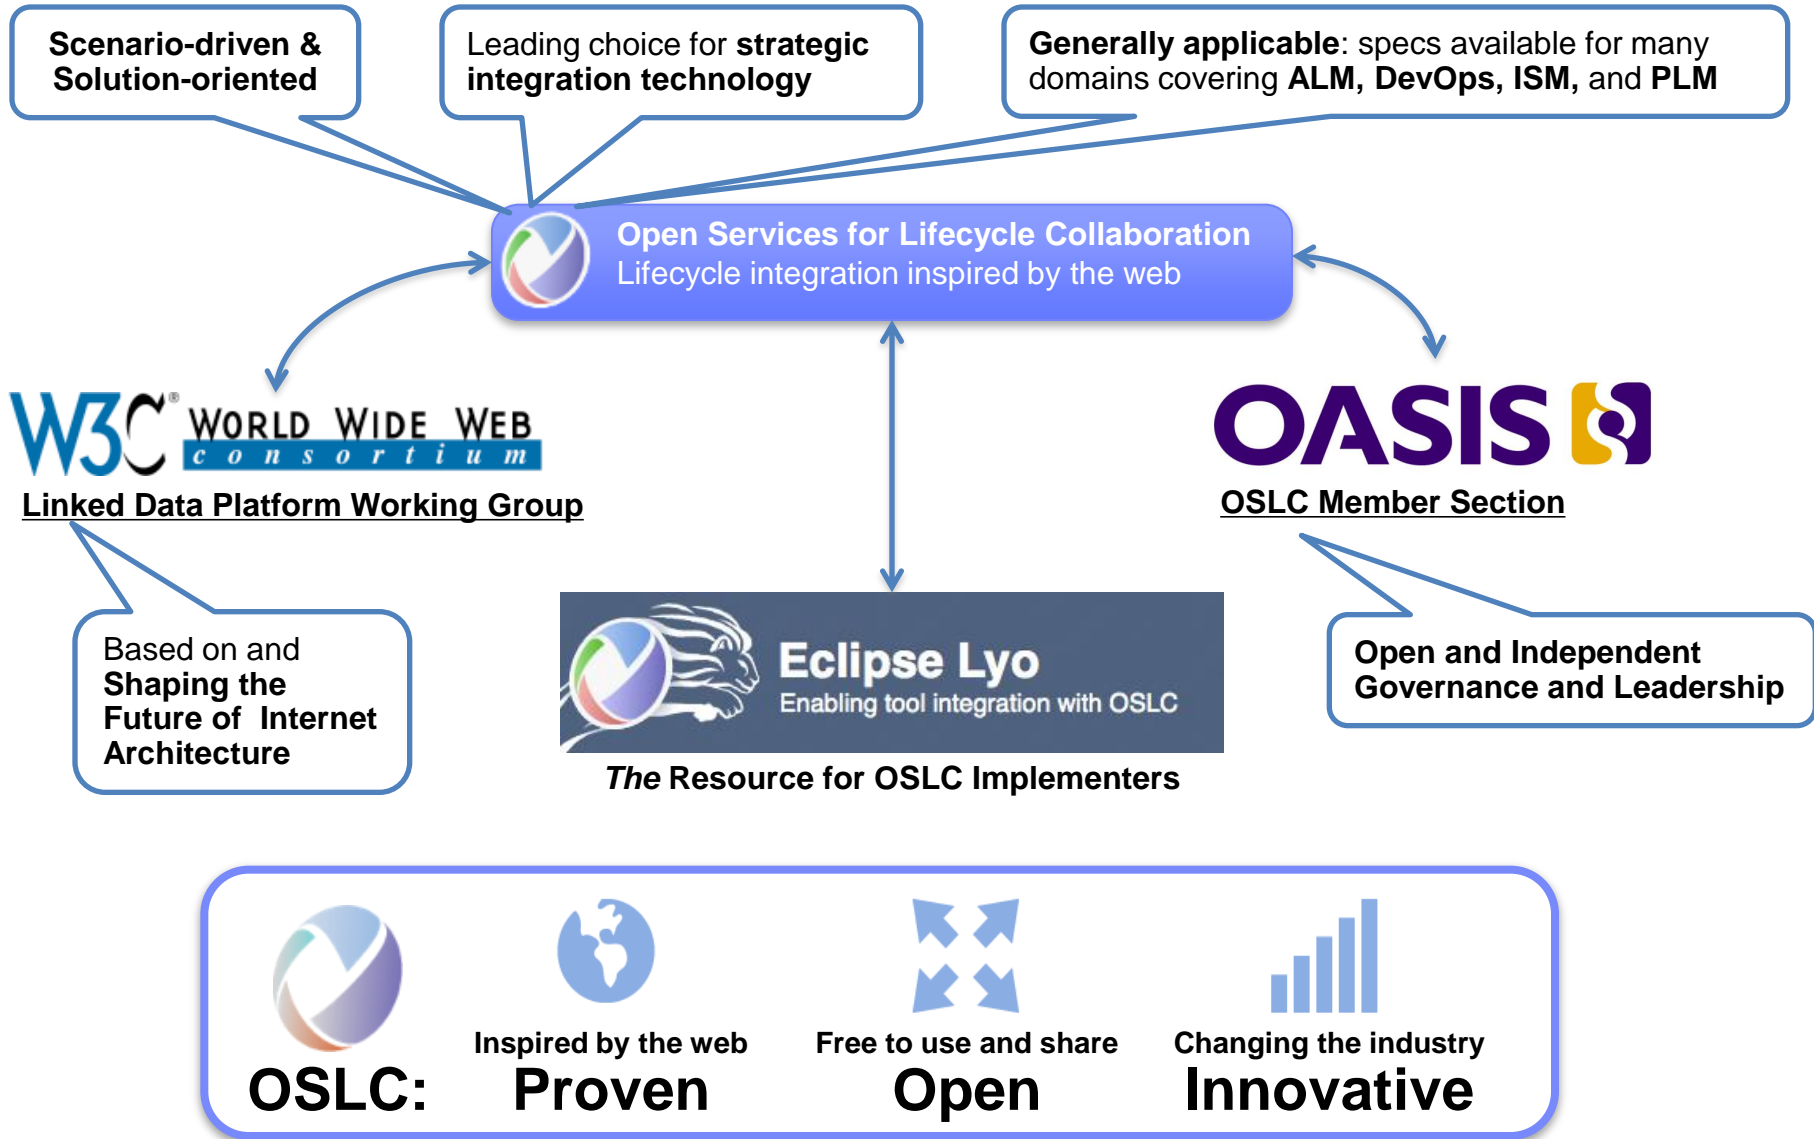

- Unanimous [OASIS Board](#) approval

OSLC is an open community building practical specifications for integrating software

OSLC is beneficial to many stakeholders

Contributing Organizations: <http://oslc.co/organizations>

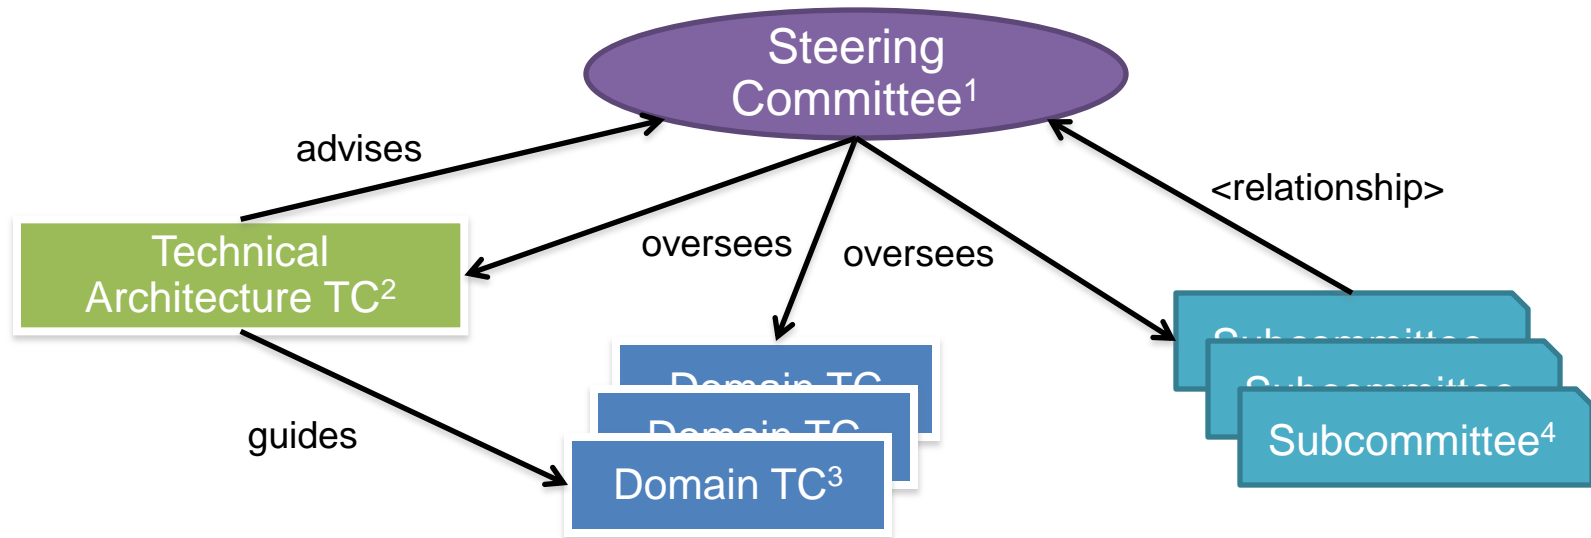

OASIS

OSLC Member Section

{ 5+ OASIS Members are the founders }

{ Other OASIS Members can join when they choose }

1. The current OSLC Steering Committee becomes the OASIS OSLC Member Section Steering Committee
2. The Core workgroup becomes the Technical Architecture TC (Technical Committee).
3. Domain TCs are created by composing several OSLC domain workgroups.
4. Subcommittees may be created by the Steering Committee for a number of purposes. E.g. scenario development and prioritization or exploration of new domains ahead of creating a new TC.
